## Biographical Note

Joseph L. Miller (1910- ), a native of Chicago, trained as a medical doctor. He moved to Oregon in 1940 with his wife, Amy, and opened a medical practice in Portland. In 1948, the family bought 94 acres near the Bull Run Reserve, in the vicinity of Marmot, Clackamas County, Oregon. There they built a small cabin, mostly for summer camping, and in 1975 established a permanent home on three acres. They donated the remaining 91 acres to the Portland Audubon Society in 1977.

In 1971, Miller discovered that the United States Forest Service (USFS) had, since 1958, allowed commercial logging in the Bull Run Watershed and planned to open a 30,000-acre area for recreational purposes in spite of a 1904 Trespass Act which prohibited these activities. Miller attended a public meeting that drew so much opposition that the USFS and the Portland Water Bureau withdrew the recreation development plan. After that meeting, Miller began a systematic effort to collect and disseminate information on the Bull Run Reserve to focus public attention on the need for watershed protection. In 1974, he organized the Bull Run Citizens' Advisory Committee, which evolved into the Bull Run Interest Group (BRIG) by 1975. BRIG was active at varying levels until about 1993. Miller was most concerned about the secrecy and lack of public information and input that he believed characterized the activities of the USFS and Portland Water Bureau, which managed the Bull Run Watershed.

In 1973, Miller and two co-plaintiffs initiated a class-action lawsuit against the USFS for allowing public access and logging in violation of the Trespass Act and won their case. However, in 1977 Congress nullified the act, and new legislation, introduced by Rep. Robert Duncan and Sen. Mark Hatfield of Oregon, specified that the Bull Run Reserve could be managed by the Forest Service according to prevailing multiple-use principles. Use of the watershed need not be confined to water production, though that use was supposed to be primary.

Miller's crusade to restore the protections of the Trespass Act continued after 1977, and, with the public scrutiny that he inspired, serious degradation of the watershed diminished. His efforts included further litigation to stop what he considered to be dubious timber sales after "blowdowns."

## Content Description

Papers include in-depth material on Joseph Miller's crusade to collect and organize information on the Bull Run Reserve and watershed and to expand public awareness of the threat to its famed pristine water through formation of the Bull Run Interest Group (BRIG). Also included is documentation of the lawsuits he initiated against the U.S. Forest Service (USFS). Because he collected correspondence, reports, and other materials from practically every agency and person involved with the Bull Run Watershed, the collection represents many different perspectives on the issues involved.

Included in the collection are Miller's personal version of the BRIG Open File that was established and continues to be available to the public in the Government Documents section at the Multnomah County Library's Central Branch (Portland, Or.), plus copies of lawsuits and correspondence generated in attempts to change USFS timber sale and logging practices. Subject files cover these issues and contain research materials from many sources, including USFS and Portland Water Bureau information and correspondence, Miller's correspondence and explanatory notes, environmental impact statements, newspaper clippings, and reports.

## Detailed Description of the Collection

The following section contains a detailed listing of the materials in the collection.

### Series A: Bull Run Interest Group (BRIG), 1909-1993, (bulk 1972-1990)

Includes the records produced in the course of BRIG's operations and Joseph Miller's version of the BRIG Open File of background materials that was established at the Multnomah County Library, where they were indexed and are available to the public. Miller's idea was that the Open File would be "a live, growing source of information on all sides of Bull Run issues. The file is open for anyone to add information or views; for anyone to help seek and index new material; for anyone to study." The series includes background on the development of the Open File and BRIG's relationship with the Multnomah County Library. The BRIG records primarily focus on actions and issues related to the Bull Run Watershed, including the Little Sandy River. They reflect the ups-and-downs of the organization from its start as the Bull Run Citizens' Advisory Committee, including efforts to revive it in 1989-1990.

The series is arranged into two subseries: 1. Bull Run Interest Group (BRIG) Records, 1974-1991, and 2. BRIG Open Files, 1909-1993.

## Series B: Joseph L. Miller's Litigation and Subject Files, 1931-1990, (bulk 1976-1978)

Includes documents and other records related to legal actions and appeals of U.S. Forest Service (USFS) management practices on the Mount Hood National Forest. The first was a class action lawsuit filed by Joseph L. Miller and others against the Forest Service and its management of the Bull Run Watershed in violation of the Trespass Act (Miller vs. Mallory, filed in 1973). After the Trespass Act was repealed by Congress, Miller and others once again initiated a class action lawsuit, Miller vs. Robertson, filed in 1977, in an attempt to stop several USFS "blowdown" timber sales. Miller also appealed the USFS Bull Run Watershed management plan in 1979

The series is arranged into four subseries: 1. Lawsuit, Miller vs. Mallory, 1931-1978; 2. Lawsuit, Miller vs. Robertson, 1976-1979; 3. Appeal of Forest Service Bull Run Watershed Management Plan, 1979; and 4. Bull Run Watershed Management Research Materials, 1929-1995.

## Series C: Bull Run Advisory Committee (BRAC) and successor, Water Quality Advisory Committee, 1978-1995

The Bull Run Advisory Committee and Water Quality Advisory Committee were established by the Portland City Council to advise on issues related to the Portland Water Bureau's management of the city's water system. Joseph L. Miller tracked their activities closely and obtained materials from them to share with the public through the BRIG Open Files.

The folders in this series are arranged chronologically.

### **Series D: Forest Service Management Issues on Bull Run Watershed, (bulk 1983-1992)**

Even after lawsuits and appeals were decided, Joseph L. Miller kept close watch on U.S. Forest Service management of the Bull Run Watershed, particularly its "blowdown" timber sale program for salvage logging, collected background material, and made numerous inquiries and protests to the U.S. Forest Service, as reflected in the papers in this series.

Series arrangement follows Joseph L. Miller's original order.

## Series E: Little Sandy River Watershed Issues, (bulk 1973-1992)

Joseph L. Miller believed that the Little Sandy River Watershed should be protected to provide a quality water supply for the town of Sandy, Or., and a backup water supply to Bull Run for the City of Portland, Or. Instead the city chose wells for backup. The series reflects Miller's activism on these issues and contains a quantity of background information he collected.

Series arrangement follows Joseph L. Miller's original order.

**Series G: Newsletters, Other Published Materials, City Club of Portland Materials, Correspondence, and Newspaper Clipping File, 1940-1995, (bulk 1971/1995)**

Joseph L. Miller, with assistance from others, produced two newsletters, letters to the editor and opinion pieces, and collected a comprehensive Newspaper Clipping File of press coverage of nearly every aspect of Bull Run and Little Sandy River Watershed management and water quality issues. Also included are records of his activities with the City Club of Portland and correspondence of Miller and associates that is not included elsewhere in the collection.

The series is arranged into six subseries: 1. *Bull Run Open Newsletter*, 1977-1987; 2. *Free Speech Out of the Closet*, 1986-1988; 3. City Club of Portland, 1972-1993; 4. Letters to the Editor and Opinion Pieces, 1973-1990; 5. Correspondence, 1971-1993; and 6. Newspaper Clipping File, 1940-1995.

Issues 81-92 were published in <i>The Alliance</i> newspaper August 1985-September 1986. It is not certain whether there was an Issue 93, but an Issue 94 was distributed as a special mailing in November 1987. The first 80 newsletters were photocopied productions ranging from one two-sided sheet to as many as four or five two-sided sheets, primarily legal but some letter size. The subseries includes two complete sets of the <i>Bull Run Open Newsletter</i>—"response sheets," and related correspondence, 1977-1979</p>	<p><b>1977</b>  <b>February-1987</b>  <b>November</b></p>

	<p><b>Subseries 2: <i>Free Speech Out of the Closet</i></b>            Dr. Joseph L. Miller published 80 issues of <i>Free Speech Out of the Closet</i> as a call to action on various Bull Run Watershed logging and water quality concerns. The title derives from his book, <i>What Good Is Free Speech in a Closet? : A story of Cover-up in Planning for our Grandchildren's Drinking Water</i>, published in 1985. The typescript newsletter ranged from a single two-sided letter-size sheet to several pages per issue, sometimes including attachments. 	<p><b>Subseries 3: City Club of Portland</b>            Correspondence, notes, reports, and speeches related to City Club of Portland's studies of Bull Run Watershed issues. Dr. Joseph L. Miller promoted study of the Bull Run Watershed by the City Club and provided extensive background information. The club established a Bull Run Study Committee in 1972, which issued a report on forest management in the watershed in 1973. The City Club's Research Committee took up the issue of hydroelectric power generation at Bull Run in 1977. In 1978, Dr. Miller made a presentation to the entire club on Bull Run Watershed issues. From 1980 through 1983, Dr. Miller urged the club to do a new study on Bull Run. In 1984, the City Club established a Land Use Subcommittee on Bull Run, and Dr. Miller provided information and spoke to the entire club. In 1987, the club began a study of the Portland city water system.</p>	<p><b>1972-1993</b></p>
