

Collection of Aerial Photographs, 1935-2001

Overview of the Collection

Title	Collection of Aerial Photographs
Dates	1935-2001 (inclusive) 1935 2001
Quantity	80 linear feet
Collection Number	XOE_CPNWS0318aerialphotos
Summary	A collection of over 30,000 individual images from aerial surveys conducted in different areas of the Pacific Northwest (including northwest counties and National Forest Lands in Washington State).
Repository	Western Washington University, Center for Pacific Northwest Studies Goltz-Murray Archives Building 808 25th St. Bellingham, WA 98225 Telephone: 360-650-7534 cpnws@wwu.edu
Access Restrictions	The collection is open to the public, with the exception of Boxes 123-134 and Oversize Folders P1-P8 (restricted until further notice). Researchers are asked to contact CPNWS staff in advance and set up an appointment to access aerial images. Since this is a large and complex collection, it may take some time to determine which aerial surveys and images are relevant to your line of inquiry. When contacting CPNWS, please provide us with as much information as possible about the area(s) of interest to you. For example: Name(s) of towns, locations or geographical features. Coordinates and/or Township/Range and Section information. Time period or dates of interest.

Historical Note

The Collection of Aerial Photographs was transferred to the Center for Pacific Northwest Studies in August 2011, as part of the former holdings of the Huxley Map Library at Western Washington University. The collection had been developed over the course of the Map Library's forty-year history, during which aerial images and flight indices appear to have been acquired gradually through donation or purchase. Since the time of the initial transfer, a small number of additional images have been donated and added to the collection at the Center for Pacific Northwest Studies.

Content Description

The Collection of Aerial Photographs comprises over 30,000 individual images from aerial surveys conducted in different areas of the Pacific Northwest including the northwest counties and National

Forest Lands of Washington State. The majority of images in the collection are from aerial surveys conducted by US government agencies, including the USDA Forest Service and Washington Department of Natural Resources. These include coverage of Whatcom County, the Mt. Baker National Forest and other National Forest and Parks lands in Washington. The collection also includes some coverage of other Washington counties and U.S. states. For example, a small group of images document survey work conducted for the Alaska-Canada Highway during the 1930s. The collection is a valuable resource for researchers interested in environmental history and change (including forestation, glaciation and waterways), and supports fields of inquiry relating to habitat restoration, urban growth studies and property history. Researchers should be aware that coverage for locations or flight surveys may not be comprehensive and that CPNWS cannot guarantee coverage and images for all areas of interest. In some cases, the collection may contain an index for a flight without any accompanying images (or vice versa).

Use of the Collection

Restrictions on Use

CPNWS staff will be pleased to retrieve aerial photographs and survey index maps and to assist researchers in their use. Please note:

- resources do not circulate and may not be checked out of the Archives Building.

- In many cases, it will be possible for CPNWS staff to scan or photocopy images. All copies will be made in accordance with the CPNWS duplication policies and fee schedule. Self-service copying or scanning is not permitted.

- Researchers should expect to spend some time working with different index sheets and sets of photographs. CPNWS staff are glad to assist and retrieve materials, but cannot do extended research for you.

Preferred Citation

[Image #; Flight Symbol, Name and Date], Collection of Aerial Photographs, Center for Pacific Northwest Studies, Heritage Resources, Western Washington University, Bellingham WA 98225-9123.

Administrative Information

Arrangement

The collection is arranged in two series:

- Series I: Flight Index Sheets and Maps, 1938-2001
- Series II: Aerial Photographs and Orthophotos, 1935-2000

Preservation Note

Stereoscopes are available at CPNWS for use by researchers.

Custodial History

Collection contents were developed by Huxley Map Library prior to the transfer of the collection to the Center for Pacific Northwest Studies in August 2011.

Processing Note

The collection was arranged and described at the Center for Pacific Northwest Studies by Eric Mastor, following organizational practices established at the Huxley Map Library. Index sheets for aerial flights are organized and described separately from corresponding photographs.

Appraisal Notes

Duplicate materials were removed from the collection during processing.
